Introduction

The compact VPort P06-1MP-M12 cameras provide an HD (720P, 1280 x 720) video image, and feature an H.264/MJPEG IP dome, giving them the versatility and ruggedness to excel in many different installations and environments for mobile IP video surveillance applications. In addition, the cameras feature EN 50155 compliance,

vandal-proofing (EN 62262 IK8), -25 to 55°C or -40 to 75 °C (T models) operating temperature, a rugged M12 Ethernet port, 1 audio input, PoE power inputs, IP66 rain and dust protection, a dehumidifying membrane, and a selectable lens.

Excellent Image Quality

The VPort P06-1MP-M12 is equipped with a cutting-edge CMOS sensor, which provides excellent high resolution video images at 1280 x 800 pixels and covers larger areas than legacy analog cameras. With the addition of DNR (Digital Noise Reduction), BLC (Black Level

Control), and WDR (Wide Dynamic Range) functions, the VPort P06-1MP-M12 provides an extremely clear picture of the surveillance region.

Rugged Hardware Design

The VPort P06-1MP-M12's 47 mm height makes it ideal for tough vehicle environments with limited installation space. It is compliant with EN 50121-3-2 (EMC), EN 61373 for shock and vibration, and essential sections of EN 50155, with standard models designed for T1 temperatures, and wide temp. models designed to withstand TX

temperatures (-40 to 70°C; note that both models are also tested for 10 min. at +15°C over the max. of 70°C and 90°C), without a fan or other cooling equipment. Moreover, the VPort P06-1MP-M12 achieves the highest enclosure protection, IEC 62262 Class IK8, providing users with a true, vandal-proof IP camera.

High Video Performance

The VPort P06-1MP-M12 is designed to provide both H.264 and MJPEG video streams and transmit a maximum of 3 independent video streams (2 H.264, 1 MJPEG) simultaneously. In addition, Moxa's DynaStream™ function allows you to change the video frame rate automatically, which can help you control your network bandwidth

budget and ease network system management. The CBR Pro™ function can guarantee the lowest packet loss in limited bandwidth transmissions, which ensures that images will not exhibit the mosaic effect. A DHCP Opt66/67 auto-configuration mechanism simplifies the workload of mass installation and maintenance by backing up the configuration on a TFTP server.
